

**Group Project Proposal:**

Name: Ranithy Ben

Project Title: Job Tracker

Project Stack: MERN

Github Repo Link: [https://github.com/somebunnycodes/job\\_tracker](https://github.com/somebunnycodes/job_tracker)

Project Description: Web app to help track potential job opportunities, various stages of the application process and a company feature that can show potential jobs at a certain company.

New Programming Concepts I'm planning to learn: Login and Registration for MERN and how a user can upload a file (CV/resume).

Product Backlog: Calendar feature with sync to Google calendar and a To-Do List for users.

**Team and primary roles:**

All 3 – Wireframe/Text Outline

Ran – Back-End/API integration

Kyle – Login/Reg, Front-End (Dashboard/View/Edit)

Bunny – Login/Reg, Front-End (Clean-Up/Finish Up), Deployment
